DISCOVER THE BENEFITS OF TASKERO UNIVERSE

DISCOVERY	The discovery process includes a study of your current situation to reveal the processes and technologies that you currently have in place. Once the discovery process is completed, a report is delivered that documents the current and desired situations, and clarifies critical issues.
ANALYSIS	The information gathered is then analyzed to provide flexible solutions designed to improve existing procedures, quality levels, efficiencies, and profitability. We generate measurable metrics and a tangible return on investment (ROI) data to help evaluate the cost versus the results.
IMPLEMENTATION	At this stage, the Fujifilm's Print Performance Team partners with your team members to ensure effective implementation. We work closely with your team to incorporate their first-hand experience. During implementation, we install Taskero Universe using the standards you specify. We will also instruct you on how to use Taskero Universe to improve processes, better enable your technology, eliminate waste and provide valuable data for strategic decision-making.
SUPPORT	After implementation, your systems will be monitored by Fujifilm's Print Performance Team. On going support is critical to maintaining processes that enable cost reductions and increased efficiencies. If your output devices enter an error state we will contact you and help resolve the issues quickly. Additionally, Print Performance Team provide any needed training, education, and technical support.

Distribution / Sales Offices

PRINT PERFORMANCE TEAM
UNMATCHED EXPERTISE. NATIONWIDE SERVICE.

As part of the nation's most comprehensive group of print technology and workflow experts, the Print Performance Team has access to and incorporates the latest technology. To keep our customers up and running at the highest possible level, we bring an unmatched heritage of color expertise, exacting quality standards, and a nationwide network of more than 200 technical experts.

For 24-hour Print Performance Team information and support, call **800-359-3854**.

FUJIFILM group Green Policy

THE FUJIFILM GREEN POLICY

We at Fujifilm believe that "sustainable development" of the Earth, mankind, and companies in the 21st century is an issue that must be addressed with the highest priority. As a socially responsible corporation, we actively undertake corporate activities with our environmental values in mind. We strive to be a dedicated steward of the environment and assist our customers and corporate partners in doing the same.

Taskero Universe

Colorpath Verified

A process-based business solution which increases

profitability** and **reduces waste

TASKERO UNIVERSE COLORPATH VERIFIED PROVIDES THE FOLLOWING:

- REAL-TIME HELP, SUPPORT AND COMMUNICATION FOR QUICK PROBLEM RESOLUTION
- CENTRALIZED INFORMATION WHICH IS EASILY ACCESSIBLE USING INTERNET TECHNOLOGIES
- BUSINESS INTELLIGENCE IN A CUSTOMIZED SOLUTION
- MECHANISMS FOR COMPANY GROWTH, PROFITABILITY AND SUSTAINABILITY
- SUPPORT FOR LEAN AND GREEN INITIATIVES

in control

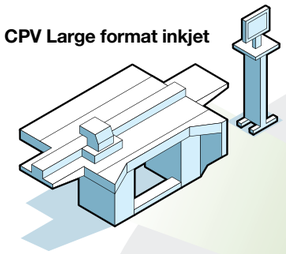
FOR INNOVATIVE EXCELLENCE ™

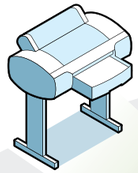
ON-SITE VERIFICATION

Taskero Universe verifies that your devices in your production environment conform to specified standards. Data from your devices are Verified and uploaded to a central web server.

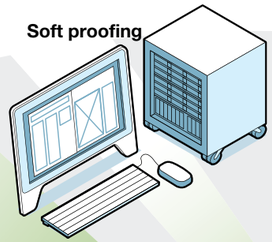
CPV Large format inkjet



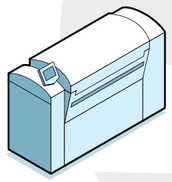
CPV Inkjet proofer



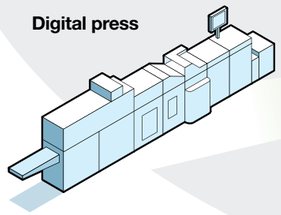
Soft proofing



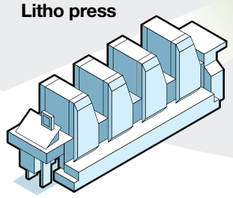
Platesetter



Digital press



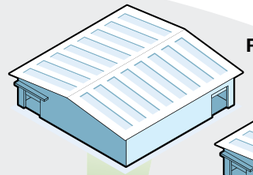
Litho press



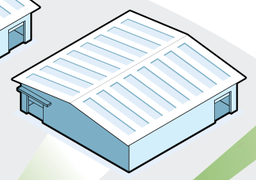
WEB ENABLED MONITORING

Ensure job consistency at remote printing sites without hard copy proofs. Status condition of devices and customized reports can be pulled remotely to better understand production efficiencies.

Remote print factory



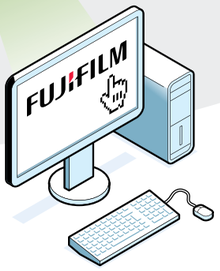
Remote print factory



in control

TASKERO UNIVERSE MONITORING

View status of jobs or devices from anywhere via the internet and create detailed reports.



ONLINE SUPPORT

Fujifilm's Print Performance Team monitors the status of your output devices and alert you when a device enters an "out of tolerance" state.

BUSINESS VALUE

Taskero Universe positively impacts your business in the following ways.

Taskero Universe
Colorpath Verified

REMOTE SITE
- Help Button
- Verification
- Remote Analysis

OPERATOR
- Help Button
- Verification
- Instant Chat

DEPARTMENT MANAGER
- Device Performance
- Error Alerts
- Online Web Analysis

REAL-TIME
- Taskero Universe provides immediate notification of errors, giving you more time to isolate and fix problems.
- Fujifilm's Print Performance Team monitors the status of your devices and delivers remote support to help you resolve issues more quickly.
- Use Taskero Universe as a dashboard for viewing current print performance across multiple sites.
- Internal experts can analyze production problems immediately.

CENTRALIZED INFORMATION
- Access Taskero Universe from anywhere via an Internet connection.
- View job information throughout your production process from proof to print.
- Gives quality control experts immediate access to valuable device performance information no matter where they are.
- Taskero Universe allows you to integrate key customers' systems for remote/off-site proofing.

BUSINESS INTELLIGENCE
- Taskero Universe contains reports for understanding consumables variation.
- Taskero Universe can help you understand which devices have the highest error rates.
- Pulling a Taskero Universe shift report can help you understand if personnel need more training.
- Taskero Universe reports highlight which variables in your process are contributing to you rework and errors.

MECHANISM FOR PROFITABILITY
- Taskero Universe provides a common quality language, which multiple departments can use to communicate problem resolution information more efficiently.
- Taskero Universe can help keep jobs looking consistent when printed on different presses, at different times or even at different sites, which increases your flexibility.
- Use Taskero Universe to communicate to your vendors the quality of the raw materials they are providing you.
- Use Taskero Universe to create job reports that can showcase your quality initiatives to prospective and current customers. Show you are the best and can prove it.

GREEN AND LEAN
- Taskero Universe reduces variation by identifying problems and root causes. Understanding raw materials variation is critical to efficient production.
- Taskero Universe reduces waste by identifying problems at their source. This means bad proofs and plates don't make it into the pressroom.
- By reducing variation and waste, less raw materials and energy are consumed in your production process.
- By using Taskero Universe for color matching, color control to ISO or other standards as well as for plate performance monitoring, you can ensure that colors are accurate before proofs are sent, eliminating the guesswork from remote proofing and reducing shipping costs.
