SPECTRODENS KEY FEATURES

QUICK MEASUREMENT OF PROCESS AND SPOT COLORS

Control your process, spot, Pantone® or other critical brand colors by measuring solid ink density, % dot area, CIE Lab, deltaE, and more

BEST COLOR MATCH

InkCheck™ feature helps press operators minimize color differences (deltaE's) by providing specific density adjustments to achieve best possible color match

ACHIEVE G7 COMPLIANCE

GrayGuide™ feature displays G7 pass/fail indication and specific C,M,Y density adjustments to obtain grayscale values according to G7 specification

TRACK DENSITIES ACROSS SHEET

Shows density variation across press sheet and provides specific ink key adjustments right on instrument display.

SCAN MEDIA WEDGE FOR QUICK PROOF VERIFICATION

Scan control wedge in seconds to confirm proofs against 12647-7 and known datasets like GRACol, SWOP3, SWOP5, IFRA, UGRA/FOGRA, G7™, etc.

DESKTOP SOFTWARE INCLUDED

Create, edit, and manage color libraries, import/export color data, generate pass/fail QC reports, and manage instrument, all with SpectroConnect.

TAILORED TO MEET YOUR NEEDS

The SpectroDens is available in 3 different models to best meet your color measurement needs (model comparison below).

WIRELESS CONNECTIVITY

Uses true WiFi connectivity to computers which boast faster communication speeds, enhanced security, and a much greater connectivity range

FAST APERTURE SWITCHING

Designed so the customer can change the measurement aperture themselves (1.5mm or 3mm apertures depending on measurement requirements)
